EMPLOYMENT HISTORY

Lead Software Engineer (Full-Stack) at National Social Security Fund (Hybrid) – (Present)

- Led full-stack development of large-scale Angular and .NET Core applications serving millions of fund members.
- Designed and implemented Angular frontends for member self-service portals, claims management, and voluntary savings products.
- Architected backend services using .NET Core with PostgreSQL and MySQL, including schema design, indexing, and query optimization.
- Delivered a property management system supporting over 4,400 housing units using Angular, .NET Web API, and relational databases.
- Designed and implemented a fault-tolerant payment processing microservice using .NET Core, EF Core, Redis, and Kafka.
- Integrated biometric fingerprint scanning and facial recognition into Angular-based applications to strengthen identity verification.
- Implemented CI/CD pipelines using Azure DevOps for automated build and deployment of Angular and .NET services.
- Reduced operational turnaround times by up to 5 days through workflow automation and improved data-driven processes.
- Mentored developers on Angular best practices, full-stack architecture, and database-driven application design.

Lead Applications Developer at Absa Bank (May 2019-Feb 2022)

- Developed full-stack enterprise applications using ASP.NET MVC, EF Core, and relational databases.
- Built ESB services using WCF and ASP.NET to enable secure inter-system communication.
- Delivered a loan processing platform backed by relational databases, reducing processing time from 8 days to 2 days.
- Integrated Experian credit scoring systems, cutting authorization time from 20 minutes to 3 minutes.
- Implemented SSO using Microsoft Active Directory and supported production deployments.

Software Developer at Pegasus Technologies (Jun 2016- May 2018)

- Designed and optimized MSSQL Server schemas, stored procedures, and reporting queries for billing and payment systems.
- Delivered billing and payment platforms serving over 800,000 users nationwide.
- Developed education and credit management systems used by over 2,000 institutions and 40,000+ agents.
- Contributed to high-volume payment gateways processing transactions exceeding USD 400M annually.

SUMMARY

PK 2026-06-23 20:40

Senior Full-Stack Software Engineer with 7+ years of experience building scalable, secure, and high-performance web applications using .net and angular.

Extensive experience delivering Angular based frontend systems and robust .NET backend services in fintech, banking, and government domains.

Strong background in relational database design and optimization using PostgreSQL, MySQL, and SQL Server across largescale production systems.

SKILLS

Frontend: Angular, TypeScript, RxJS, Angular Material, HTML5, CSS3, REST API Integration.

Backend: C#, .NET Core, ASP.NET Web API, EF Core, Fast Endpoints, WCF

Databases & Messaging: MSSQL Server, MySQL, Redis, Kafka.

Cloud & DevOps: Azure, Docker, Kubernetes, Azure DevOps, Nginx, IIS

Engineering Practices: Microservices Architecture, CI/CD, Secure Systems Design, Code Reviews, Agile/Scrum

EDUCATION

Bachelor's Degree in Software Engineering (2016)

Makerere University
