

NSSF Go App Redesign – QA Test Report

Project: NSSF Go App Redesign (Mobile Application)

Description: This report details the quality assurance testing phase for the redesigned NSSF Go mobile application. The app provides NSSF members with a comprehensive platform to manage their social security fund, including features for new member and company registration, contribution management, benefits claims, financial planning (SmartLife), and profile updates.

Test Objective: To verify the functionality, usability, and stability of the redesigned NSSF Go mobile application. This includes validating all user flows, UI elements, data accuracy, and error handling to ensure the application is ready for production deployment.

Date: 20-Oct-2025

1. Test Summary

This section provides a high-level overview of the test execution results for the entire project, reflecting the latest test cycle.

Total Test Cases	Executed	Passed	Failed	Skipped/Blocked	Pass Rate
255	243	238	5	12	97.9%

- **Executed:** Total Test Cases minus Skipped / Blocked.
- **Pass Rate:** (Passed / Executed) * 100.

2. Testing Scope & Environment

- **Testing Types Performed:** Functional Testing, UI/UX Validation, Usability Testing, and Error Handling.
- **Environment:** User Acceptance Testing (UAT)
- **Platforms:**
 - Samsung Galaxy A32 | Android Version 13

3. Test Coverage by Module

This table breaks down the test results by each application module.

Module	Test Cases	Passed	Failed	Skipped	Pass Rate
Landig Page	10	10	0	0	100%
Become a Member	26	22	2	2	91.7%
Register a Company	21	18	1	2	94.7%
Login	12	9	1	2	90.0%
Authentication	9	9	0	0	100%
Dashboard	14	14	0	0	100%
E-Statement	5	5	0	0	100%
SmartLife	36	36	0	0	100%
Benefits	44	41	0	3	100%
Contributions	24	23	0	1	100%
Standing Orders	17	16	1	0	94.1%

Module	Test Cases	Passed	Failed	Skipped	Pass Rate
Profile	17	17	0	0	100%
Other Modules	20	18	0	2	100%
Total	255	238	5	12	97.9%

Note: Other Modules include Salary Analysis, Calculators, Whistleblow, Financial Literacy, and Logout.

4. Analysis of Skipped & Blocked Test Cases

A total of **12 test cases** could not be executed, slightly limiting overall test coverage, especially for edge cases and specific user scenarios. The main reasons are:

- **Lack of Test Data (5 cases):** Certain scenarios could not be tested due to missing accounts or data in the UAT environment. Examples include duplicate passport/company registrations (*TC031, TC056*) and benefits claims for specific employment types (*TC144, TC168*).
- **Environment Limitations (4 cases):** Some tests were blocked by UAT environment constraints, such as the inability to receive SMS/email notifications (*TC032*) or OTPs (*TC065, TC066*).
- **Dependency on External Services (3 cases):** Tests requiring third-party integrations could not be completed. This includes TIN/BRN lookups (*TC052*) and handling of failed payments (*TC198*).

5. Defect Summary

ID	Module	Description	Severity
D001	Become a Member	Fatal error on Passport Registration: Invalid character "\" looking for beginning of value. (TC029)	Critical
D002	Standing Orders	Data Not Updating: Unable to load the list of standing orders. (TC217)	Major
D003	Register Your Company	Contradictory Validation: The email field is marked optional but is functionally mandatory, blocking submission. (TC047)	Major
D004	Login	Intermittent Network Error: Login with a valid phone number sometimes fails with a server connection error. (TC061)	Major
D005	Benefits	Intermittent Network Error: Uploading some documents for a benefits claim fails. (TC153)	Major
D006	Register Your Company	System blocks registration if the contact person's NIN is already an individual member. This should not be happening (TC057)	Major
D007	Standing Orders	UI Bug: The date picker for "End Date" malfunctions and makes text unreadable. (TC211)	Major

ID	Module	Description	Severity
D008	Become a Member	Missing UI Element: There is no back button on the registration page, forcing use of the native phone back button. (TC036)	Minor
D009	Login	Missing UI Element: There is no back button on the login page. (TC069)	Minor
D010	Login	UI/UX Defect: The error message for an incorrect OTP is unclear. Use "Invalid or expired OTP. Re-initiate." Instead of "Authentication Failed" (TC064)	Minor
D011	Register Your Company	The success message is being displayed as an error message. (Red background) but also, it is not clear, it says: "Employee registration awaiting approval" instead of company. (TC051)	Minor

6. Recommendations & Conclusion

The NSSF Go App has demonstrated strong stability with a **97.9%** pass rate, confirming that most modules including Dashboard, SmartLife, Benefits, Contributions, and Profile are functioning as expected and ready for production.

However, a few issues should be addressed before full rollout. The critical defect (D001) in Become a Member must be fixed to prevent blocking new user registrations. Major defects in Standing Orders (D002, D007), Company Registration (D003, D006), Login (D004), and Benefits (D005) should also be resolved or mitigated to ensure smooth user experience and data accuracy.

Minor UI/UX issues such as missing navigation buttons and unclear messages (D008–D011) do not prevent deployment and can be scheduled for the next maintenance release. Additionally, preparing more complete test data will enhance future test cycles.

After resolving key defects, a targeted regression test shall confirm the fixes, followed by performance validation before public launch.

Overall, the application is fit for production rollout once the critical and major defects (D001–D007) are addressed.
